## SUMMARY

Quality Assurance Engineer with 6 months of professional working experience in UI and API automation Testing. Well acquainted with all phases of SDLC and STLC. Strong experience in automating Web Application Testing using Selenium Webdriver and Hybrid framework. Knowledge in API testing using Postman and Rest Assured. In-depth understanding of Agile - Scrum Methodology.

---

## EXPERIENCE

### QA Automation Software Engineer Trainee | AURISS TECHNOLOGIES INC. | January 2024 - Present

- Involved in Test Planning, Test Design, Test Data setup, and Defect Management.
- Integral part of Automation framework building from scratch.
- Worked on web automation testing using Selenium with Core Java, TestNG, Data-Driven Testing using Apache POI, and BDD Cucumber Framework.
- Utilized Maven for adding dependencies.
- Implemented Page Object Model and Page Factory for initializing web elements.
- Proficient in using Git, GitHub, and Jenkins for CI/CD processes.
- Experienced in using test management tools like JIRA for defect logging, Creating Tasks, User Stories, Defect tracking, and prioritizing defects.
- Conducted manual testing and utilized POSTMAN for testing, writing POSTMAN Tests, and Pre-request Scripts using JavaScript.

### QA Automation Software Engineer Intern | AURISS TECHNOLOGIES INC. | October 2023 - January 2024

- Assisted in test planning, test design, and test data setup under the guidance of senior team members.
- Contributed to the development of automation frameworks, gaining hands-on experience in framework architecture and implementation.
- Executed web automation testing using Selenium with Core Java, participating in data-driven testing utilizing Apache POI.
- Familiarized with TestNG and contributed to test suite development.
- Collaborated with team members in utilizing Git, Github, and Jenkins for version control and continuous integration/continuous deployment (CI/CD) processes.
- Engaged in manual testing using POSTMAN, writing tests and pre-request scripts using JavaScript.
- Gained exposure to defect management processes, including logging defects in JIRA, creating tasks, user stories, defect tracking, and prioritizing defects.
- Supported the team in various aspects of quality assurance, including regression testing, functional testing, and performance testing.
- Actively participated in team meetings, discussions, and knowledge-sharing sessions to enhance skills and contribute to project success.
